

Mike Tobin

In 1985, Mike was diagnosed with testicular cancer. Mike was 30 years old. Mike had gone in for his yearly physical when his doctor found it. Mike was then sent onto a oncologist for further testing. Mike's doctor said to him that yearly physicals are very important and in this case it was. Mike's cancer was caught in the very early stage. Mike underwent 6 weeks of radiation and many tests at this time. The radiation was successful and no chemo was needed. Mike was living in Lincoln, Nebraska at this time. He had a great team of doctors and was able to rise above this all...
